	Website Performance / SEO - On-Page SEO - Page Speed Optimization		

WORK EXPERIENCE

Shephertz Technology Private Limited

Aug 2024 – Present

- Designed and developed landing pages, blog pages, and enterprise website layouts for platforms like TalentAnywhere and WAnywhere
- Built complete website pages from scratch for BrowserAnywhere, ensuring consistency and usability
- Created UI layouts and responsive components for AgenticAnywhere using Figma and AI tools
- Ensured mobile responsiveness, cross-browser compatibility, and on-page SEO optimization across all projects
- Improved website performance, image optimization, and user experience through clean and scalable design
- Used AI tools (ChatGPT, Gemini, Figma AI plugins, Anima, Cursor) to accelerate development workflows
- Converted Figma designs into responsive code using tools like Anima
- Reduced development time and improved efficiency using AI-assisted coding approaches
- Designed UI creatives and assets using Adobe Photoshop
- Built reusable templates (resume templates, UI components) improving design consistency
- Successfully handled projects independently during absence of senior team members
- Delivered high-quality work within tight deadlines by quickly adapting to new tools

PROJECTS

Personal Portfolio Website -- Tech: HTML, CSS, JavaScript

- Designed a modern, responsive portfolio website with engaging UI, smooth animations, and interactive elements
- Ensured cross-browser compatibility, mobile-first responsiveness, and optimized performance for seamless user experience

TalentAnywhere -- Tech: HTML, CSS, JavaScript, WordPress, SEO

- Built high-converting landing pages and resume templates with clean, user-focused UI, improving engagement and usability
- Developed SEO-optimized blog pages while enhancing responsiveness, speed, and overall website performance

WAnywhere -- Tech: HTML, CSS, JavaScript, WordPress

- Built dynamic pages (blogs, forms, tables, layouts) with intuitive UI components, ensuring smooth and engaging user interactions
- Independently handled development tasks, maintaining consistent user experience, visual flow, and high usability across the platform

Online Ticket Booking System -- Tech: JavaScript, Cursor AI

- Developed an AI-powered ticket booking system (Hotel, Bus, Car) with smooth user flows for seamless search and booking experience
- Leveraged Cursor AI for faster development and optimized code, delivering a clean, responsive, and user-friendly interface

BrowserAnywhere & AgenticAnywhere (AI-driven Development & UI Design)

Tech: HTML, CSS, JavaScript, Figma, AI Tools

- Developed and contributed to end-to-end website development and AI-driven UI design, building responsive pages with clean, modern user interfaces
- Leveraged AI tools (Cursor, ChatGPT, Figma AI) to accelerate development, enabling faster design-to-code conversion and efficient workflows
- Focused on performance optimization, scalability, and seamless user experience, improving productivity through smart AI-assisted execution

EDUCATION

Diploma in Computer Science Engineering	Sep 2022 - June 2024
Govt Polytechnic for women in faridabad -- CGPA: 8.1 / 10	
Bachelor of Technology (B.Tech) in Computer Science Engineering	Sep 2024 - Present
Rattan Institute of Technology and Management	

RESPONSIBILITIES

- Designed and developed responsive, user-centric web pages using HTML, CSS, and JavaScript
- Created UI/UX designs, wireframes, and interactive prototypes using Figma
- Built and customized WordPress websites, including landing pages, blogs, and dynamic layouts
- Ensured mobile responsiveness, cross-browser compatibility, and on-page SEO optimization
- Leveraged AI tools (ChatGPT, Cursor, Figma AI, Anima) to accelerate workflows and improve productivity

ADDITIONAL INFORMATION

Languages:

- English (Professional) , Hindi (Native) , Japnese (Basic) , Bhojpuri (Additional)

Awards & Achievements:

- Recognized for delivering projects within tight deadlines while improving performance, responsiveness, and overall user experience
- Quick learner with a strong focus on modern UI/UX trends, user-centric design, and AI-driven development workflows
